

FUEL CATALYST TECHNICAL BULLETIN

PT-LPG - Fuel combustion modifier

PT-LPG - Fuel catalyst (fuel additive) for LPG Automotive and Industrial

Package designed to provide refiners and fuel distributors an economical solution to produce a cleaner propane fuel and meet environmental requirements. Adding PT-LPG to propane greatly improves combustion so that toxic emissions released into the air are substantially reduced while providing greater protection to engines.

Fuel catalyst with remarkable properties that substantially improve the performance of even fuels of mediocre quality. Adding PT-LPG to propane fuel greatly improves combustion so that toxic emissions released into the air are reduced while providing greater protection to engines.

Product benefits

- Keep fuel and delivery systems in peak conditions
- Keep internal engine parts clean
- No mechanical adjustment needed
- Improve engine combustion and performance
- Keep injector clean
- Add more power to engine
- Eliminate carbon deposit
- Remove water buildup
- Reduce noises and increase engine power
- Eliminate and prevent carbon and gum deposit
- Improve fuel economy
- Reduce maintenance costs

Packaging: Iso Tank and 55 gal non-returnable- steel drums
